

## qualifications

- 9 year career in web development, working as either a Developer or Designer.
- Strives to deliver the best possible product.
- Desire to learn new techniques and technologies.
- Honest, adaptable, humble, and has a decent sense of humor.

## skills

### Development

- Expertise in CSS3, Sass, HTML5, Javascript, jQuery, Bootstrap, responsive design, front-end development and front-end Drupal development.
- Very knowledgeable about Drupal 7 or 8 development/site building (see "Drupal" below).
- Very comfortable with PHP in a procedural style and currently learning more OOP principles.
- Some experience with and very interested in AngularJS or other JS frameworks.

### Tools & Techniques

- Git, Bash/CLI, Drush, MAMP stack, Sass, BEM, Grunt, Gulp, Agile, multiple environments.

### Drupal

- Theming through hooks, custom templates, and Twig.
- Site building and architecture through Content Types, Fields, Taxonomy, Views, Paragraphs, Panels/Page Manager, custom modules, and various contrib modules.
- Tracking and deployment of configuration using Features module or Drupal 8 Configuration Management. Database updates through update scripts.

### Design

- Experience with Adobe Illustrator, Photoshop, Fireworks, and creating wireframes and mockups.
- Natural eye for design and a skilled illustrator.

## experience

### FOUR KITCHENS

- Frontend Engineer, Four Kitchens
- 2016

- Worked with a small team to rebuild the website for the NYU Wagner School of Public Service, moving it from Drupal 7 to Drupal 8.
- Gained great experience with the Twig templating engine, the Paragraphs module, and the peculiarities of Drupal 8. Used Twig to provide one template for both Drupal and a live style guide.
- Helped architect the front-end of the NYU Wagner site in a highly componentized approach. Used BEM syntax to produce easily legible HTML and Sass.

### METAL TOAD

- Developer and Jr. Developer, Metal Toad
- 2013 - 2016

- Worked with Metal Toad development team to build Drupal based websites and web applications for a wide range of companies and organizations including Intel, DC Entertainment (DC Comics, Mad Magazine), Hub Network/Discovery Family, MPAA (Motion Picture Association of America), Ziba, Cambia, PeaceHealth, Technology Association of Oregon, UNFI, and Savers.
- Responsible for the success and on time delivery of projects through development, estimation of tasks, and communication with team members, project managers, designers and clients.
- Focused on front-end development and strived to write clean, modular CSS/Sass and effective JS and jQuery. Delivered responsive, mobile friendly experiences and enforced design standards and web best practices.
- Became a reliable resource for Drupal development, achieving results by working within the framework of Drupal and not by working around it.
- Became one of the first two Junior Developers to graduate Metal Toad's Junior Program and be promoted to Developer.
- Rebuilt metaltoad.com in Drupal 8 with a small team of Developers.

### GREEN BAY NET

INTERNET / CONSULTING / WEBSITES

- Web and Graphic Designer, Front-End Drupal Developer, Green Bay Net
- 2007 - 2013

- Designed and developed Drupal websites for a variety of businesses, organizations and non-profits, including Shopko, restaurants, breweries, construction companies, a hospital, law firms, a state senator, and several e-commerce businesses.
- Responsible for the design of websites, logos, and print assets for both clients and the Green Bay Net brand.
- Met with clients for project planning and communicated with them throughout the course of the project.
- Worked with Green Bay Net team to build a custom Project Management System through Drupal for better communication with clients.
